Fullstack Developer

Skills

- Next.js | React | JavaScript | HTML | CSS | PHP | Java | C | C++ |
- SQL Server | MySQL | PostgreSQL | .NET | Supabase
- Git | GitHub | GitLab | Postman | Visual Studio | Visual Studio Code
- Vercel | GCP | AWS | DNS/Domain Routing | Network Fundamentals
- Jira | Asana | Trello
- Figma | Sketch | Adobe XD | Photoshop | Illustrator | Premiere Pro | After Effects
- Claude | ChatGPT | AI-assisted development
- English | Spanish

Experience

Fullstack Developer — **LaburoLibre** — **Uruguay** — **2026**

- Acted as lead fullstack developer, owning architecture decisions from frontend framework to database and hosting.
- Built the frontend in Next.js and designed the full design system from scratch (components, spacing, typography), ensuring visual consistency across the product without a dedicated designer.
- Used Supabase as backend/database layer, implementing auth, data models, and API logic for a production application.
- Managed deployment pipeline via Vercel and configured domain/DNS routing through GoDaddy, owning the app from code to live production.
- Delivered as a solo/freelance developer, handling client communication, scoping, and iteration cycles directly.

Fullstack Contractor — **AlammoIT** — **Uruguay** — **2023 - 2025**

- Contracted as fullstack developer for a clinical management startup, building infrastructure to manage patients, doctors, and mental health professionals across separate patient- and professional-facing portals.
- Led a frontend revamp, migrating the legacy build tooling to Vite and replacing a generic Bootstrap UI with Ant Design, modernizing the interface and improving load/build performance.
- Worked on a .NET 6.0 backend paired with a React frontend, contributing to both API-level and UI-level changes.
- Set up and maintained CI/CD via GitHub Actions, deploying to AWS EC2, reducing manual deployment steps and release friction.
- Collaborated directly with stakeholders to translate clinic workflow needs (patient intake, doctor scheduling, mental health tracking) into functional product features.

Fullstack Developer — **Taxis Cristal** — **Paysandú** — **2023 – 2025**

- Built the company's taxi fleet management application end-to-end using Laravel (PHP) for the backend and custom React components for the frontend, with MariaDB on a self-managed XAMPP environment.
- Designed the database schema and core business logic for dispatch, driver assignment, and trip tracking, reducing manual coordination between office staff and drivers.
- Owned the full lifecycle from requirements gathering with office staff through deployment and post-launch fixes, working as sole developer on the project.
- Handled UI/UX design and frontend implementation in the same codebase, cutting handoff time between design and development to zero.

Designer & Social Media Manager | **Betclever** | **England** | **2019 - 2021**

- Led design of the company's mobile application and website, focusing on engaging visual elements and consistent branding.
- Oversaw quality and functionality of design implementation across platforms, coordinating with developers to ensure UI was built to spec.
- Created digital advertisements for social media campaigns, boosting engagement and driving traffic to company events.
- Developed branding materials, including logos and artwork, for the company and its partners.

Designer & Social Media Manager | **BeEnglish** | **Paysandú** | **2020 - 2021**

- Designed logos and banners for social media, ensuring cohesive branding across all platforms.
- Created promotional materials that effectively communicated the institute's values and offerings, enhancing engagement and visibility.
- Designed the logo used on the institute's main facade, contributing to a strong and recognizable brand presence.
- Produced final tests and educational materials for the institute, ensuring high quality and clarity.

Education

Technologist Degree in Computer Science | **UTEC – UNIVERSIDAD TECNOLÓGICA** | **Paysandú** | **2022 - 2026**

Electrical Engineering | **UTU – UNIVERSIDAD Del TRABAJO DEL URUGUAY** | **Paysandú** | **2017 - 2021**

Certifications

EF SET English Certificate
